LENS FOR STREET LIGHTING

A5697624

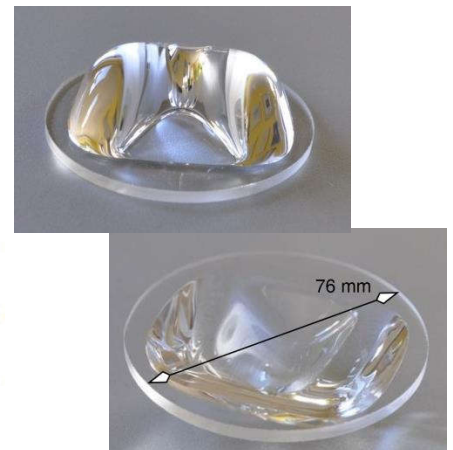

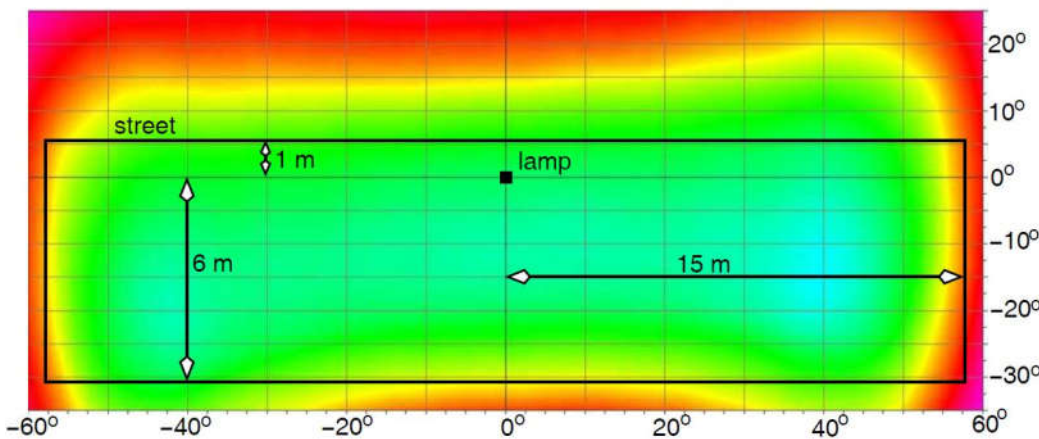

Recommended instalation:

Simulation and lens design:

Verification of angular light distribution:

Lens is designed for high power LEDs (over 30 W) with size from 12x12mm to 18x18mm. One lens is used per one LED. Measured lighting angle is 45x110° which corresponds to illuminated area 8.5x30m when lamp is 10m above the ground.
